DETAILED ACTION

1. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Japan on 12/27/2000. It is noted, however, that applicant has not filed a certified copy of the application as required by 35 U.S.C. 119(b). Applicant also mentions priority under 35 U.S.C. 120 in the response but there does not appear to be any priority of this type.

Election/Restrictions

2. Claims 4 and 5 drawn to species of oxidizers are no longer withdrawn due to the indication of allowability of the generic claim 1.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. Claims 12-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Canterbury et al(6,019,861) in view of Serizawa et al(6,368,432).

Canterberry discloses a gas generating composition that comprises a three oxidizer system of 35-80 % (col. 5, lines 5-43) as well as binders and processing aids such as iron oxide and silicon (col. 6, lines 9-22). The processing aids are present in the amount of .5-5 % (col. 5, lines 40-43). The oxidizers include potassium nitrate, ammonium perchlorate, and ammonium nitrate (col. 5, lines 30-35). The ammonium

nitrate can be phase stabilized (col. 4, lines 55-60). The mixture of these three particular oxidizers is not disclosed.

Serizawa et al teaches the use of microcrystalline carbon powder with a gas generating composition for use with an air bag that comprises ammonium nitrate (see claims).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to select the particular oxidizers from the ones disclosed by Canterbury since it is suggested to use a three oxidizer system and also to vary the amounts of the three oxidizers within the range disclosed by Canterbury to achieve a desired result. It is well-settled that optimizing a result effective variable is well within the expected ability of a person of ordinary skill in the subject art. *In re Boesch*, 617 F.2d 272, 205 USPQ 215 (CCPA 1980), *In re Aller*, 220 F.2d 454, 105 USPQ 233 (CCPA 1955). It would also have been obvious to use a microcrystalline carbon powder since Serizawa suggests that it can be used to improve the combustion performance of the gas generating composition (col. 4, lines 12-21).

Response to Arguments

5. Applicant's arguments regarding the claims that now include the language "consisting essentially of" are persuasive. However, new claims 12-14 still contain comprising as their scope and thus Canterbury in view of Serizawa is effective in a rejection against those claims. Applicant may wish to change the scope of these claims to "consisting essentially of" or to amend them to include the particle sizes from claim 11 which are not found in the prior art.

Allowable Subject Matter

6. Claims 1-8, 10, 11, and 15 are allowed.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
